

## Fiorella Features and Benefits

### World Class Ease-of-Use

All lift functions can be controlled via the **standard, jewel-like keychain remote** or through an intuitive multi-language LCD interface. The **LCD interface informs users when service is required** or a maintenance interval is approaching, both with visual messages and audible reminders

### Italian Design

Until now, platform lifts sold in North America have been industrial-looking, steel beasts that dominate vehicle interiors. Fiorella's Italian design team has developed a platform lift **that integrates beautifully with your vehicle's interior**. For customers who desire the highest level of visual integration, the external covers can be painted to match the vehicle exterior.

### Quality

Fiorella's attention to detail is not limited to aesthetics. The lift is **perfectly smooth and refreshingly quiet** during operation, and **completely rattle-free** when the vehicle is in motion. Fiorella's intense quality processes allow VMI and Fiorella to warranty the F300 for three years.

### Compact Size

Fiorella lifts utilize cutting edge materials and operate with a single lift arm, making them incredibly compact. In side entry applications, the Fiorella F300 provides **full use of the front driver and passenger seats**. Fiorella lifts also **fold in half to optimize visibility** for the vehicle driver.

### Lightweight

The Fiorella F300 weighs only 250lbs., nearly 100lbs. less than most other lifts. According to [www.fueleconomy.gov](http://www.fueleconomy.gov), his weight savings translates into a **2% improvement in the fuel economy** of a typical vehicle.

### Modularity and Versatility

The LCD control unit of the Fiorella F300 is detachable and can be **relocated anywhere in the vehicle** when space is at a premium. In addition, Fiorella lifts are offered in **both right and left arm configurations**, making it possible to optimize lift installation for specific applications and positions. For example, a right arm Fiorella F300 aligns the platform with the removable two-person split bench seat in a Ford Transit Connect, drastically simplifying wheelchair positioning and securement.

### Safety

Fiorella lifts are equipped with automatic inboard and outboard rollstops, weight sensors, and a unique anti-crushing device on the lift arm (patent pending). If any object or body part interferes with the arm motion, the **lift will automatically stop to prevent possible injury**

### Simple Installation

Crash-tested installation brackets have been developed for most vehicle applications. **Installation should take three hours or less** (versus eight hours for competitors' lifts), saving time and money for dealers and their customers.

### Value

Despite all of these advantages, the Fiorella F300 **costs about the same as other popular lifts**. The reduced installation time widens the price gap, making the Fiorella F300 the best value on the platform lift market.
